#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (instant Background of the Invention) in view of Costa 6438832 and Sward 6439900.

The admitted prior art discloses a shared electrical and optical transmission equipment of a plug-and jack-type with identification terminals substantially as claimed. However, the admitted prior art does not disclose each of the identification terminals as being entirely plated with solder, and additionally plated with gold exclusively at the contact portion. Costa discloses coating the entire terminal with solder. Thus it would have been obvious to coat the entire surface of the identification terminals of the admitted prior art with solder, to protect the base metal. The admitted prior art also does not disclose gold plating exclusively at the contact portion. Sward (the paragraph bridging columns 1 and 2) discloses applying gold only on contact surfaces of the terminal. Thus it would have been obvious to coat the contact portions of the admitted prior art terminals with gold, for better conductivity. The resulting structure would inherently have very low resistance, the specific resistance being an obvious matter of routine experimentation. The method of applying the gold (i.e. flash plate) does not carry weight in an article claim.

Ma disclose solder and gold cladding.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on 571-272-2800, ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
